

IMPORTANT INFORMATION ABOUT YOUR DVR

The new Bright House Networks Digital Navigator will soon be downloaded to your DVR. It will bring exciting new features, such as Caller ID on TV and easier ways to find, record and watch your favorite programming.

BEFORE THIS DOWNLOAD:

Review your Show List of recorded shows. The upgrade process may delete some recordings if there is not enough disk space available.

We recommend that you **view any unwatched shows** and **delete as many as possible**. This will increase disk space.

You should also make note of your current settings in the checklist at right.

AFTER THIS DOWNLOAD:

We recommend you check the following settings:

1. **Parental Control:** Make sure all your channel, rating and other blocking settings are in place.
2. **Favorite Channels:** Verify that the channels you have selected as favorites are still selected.
3. **Timers:** Check any timer settings you have (power on/off, reminder or sleep timers).
4. **Settings for Recorded Shows:** Settings for recordings of currently airing shows (within the next 5 days) will not be affected by the download. However, if you have a recording set for a series that is not airing within the next 5 days, then that setting will no longer be available.
6. **HD Aspect Ratio:** To make sure that your Aspect Ratio is correct after the download, press the SETTINGS BUTTON, select Display, then Aspect Ratio.

MY SETTINGS CHECKLIST

Use this checklist to remember your current settings and check them after the download. The current download schedule can be found on channel 50 or at cfl.mybriighthouse.com/digitalnavigator.

PARENTAL CONTROL

I have blocked channels by:

Channel Number:

Ratings:

Time:

Title:

FAVORITES

My favorite channels are currently set as:

TIMERS

My timers (sleep, power on/off, etc.) are currently set for:

FUTURE SERIES

I want to record these series when they come back on the air:

HD ASPECT RATIO

My HD Aspect Ratio setting is currently:
